Stop building AI without architecture. Start designing enterprise-grade Agentic AI with the governance, structure and operating model discipline it demands. This intensive 2-day programme equips enterprise architects, AI leads and transformation teams with the frameworks to design safe, scalable and **executive-ready Agentic AI systems**.

Master operating models. Design control planes. Blueprint your MVP. — 100% HRDF Claimable.

Who Should Attend

Enterprise and solution architects, AI/ML leads, digital transformation teams, product owners, governance and risk stakeholders, and innovation leaders planning AI pilots, MVPs and scaled autonomy.

Why Sign Up

Most organisations rush into Agentic AI through tools and pilots without architectural discipline. This programme helps you think upstream — governance, control, trust boundaries, operating models, autonomy staging and MVP readiness.

What You Will Learn

- 1

AOMF & Operating Model Foundations
Architecture Operating Model Framework, RACI, capability maps, decision rights, funding gates, maturity scoring and regulatory overlays. Frame agentic AI as an enterprise architecture problem.
- 2

Agentic AI Architecture & Runtime Design
Agent vs platform, governance, control, runtime and support planes, autonomy vs authority, perceive-reason-act-learn loops, multi-agent collaboration and memory systems.
- 3

Discovery & Design Phase Mastery
AI ambition, autonomy tiers, risk posture, regulatory scoping, data sovereignty, reference architectures, trust boundaries, bridge specifications and autonomy controls.
- 4

MVP Design Patterns & Scaling Waves
Thin-slice governance, minimal control planes, first production agent, risk-bounded autonomy, funding gates, rollout sequencing and executive checkpoints from MVP to scaled autonomy.
- 5

Architecture Design Studio & Vibe Coding
Hands-on design studio to define AI ambition, must-have operating models, plane architecture and MVP roadmap. Plus AI-assisted prototyping to rapidly draft agent workflows and architecture artefacts.

Discipline-First Approach
Starts with the AOMF framework — mapping people, process, technology, governance and runtime before touching tools.

Highly Practical & Applied
Hands-on design studio, architecture exercises, discovery deliverables and MVP roadmap produced during the programme.

Immediate Career Differentiation
Stand out as a professional who can govern, architect and communicate Agentic AI with executive credibility in regulated environments.

Leave with a clearer pathway from discovery to design, governance to MVP, and concept to executive-ready roadmap — standing out as a credible, architecture-literate AI leader who connects strategy, risk, operating models and implementation.

Ready to design Agentic AI with greater confidence, governance and architectural rigour? Enroll your team in this high-impact 2-day programme and build enterprise-grade AI systems the right way.

Inhouse and public run options available. Contact us for pricing and scheduling.

Pre-register to secure your seat today.
